RE: Groundwater Sample Results, Aircraft Display Area, Naval Station Mayport, Florida

Dear Ms. Wilson:

I have reviewed the above document dated February 3, 1999 (received February 11, 1999). Ground water sampling at the site did not detect contaminants at concentrations exceeding regulatory MCLs. Prior soil sampling indicated the presence of benzo(a)pyrene at concentrations exceeding residential SCTLs but which were below industrial SCTLs. Given that the site is an active industrial area, the Navy has recommended industrial land use restrictions be placed on the site, under the provisions of the NAVSTA Mayport Memorandum of Agreement for Land Use dated August 31, 1998. I concur with that recommendation.

If you need further clarification or any additional information, please feel free to contact me at 850-921-4230.

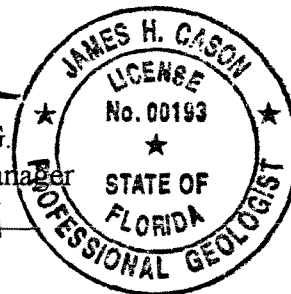

Sincerely,

James H. Cason, P.G.
